[Man]: "My seven year old girl comes up to me and she's scared and

she says, 'will stem cells be an answer for me, will there be a cure for me?' And I am absolutely

confident in saying that this will happen.

It would be just such a shame if 10-20 years from now

we had this great opportunity and we missed it. And we'd have to be telling that

seven year old girl 20 years from now, that um yeah

there was this great opportunity and we let it slip by.

Please join me on voting yes for Prop 71."
